

Simplex Strip Doors

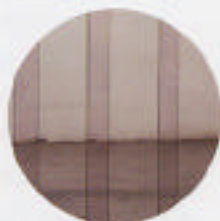

A full measure of quality.

The Simplex Door Immediately after Installation

Installation Time -
35 minutes
**Replacement Time
for 2 Strips** -
5 minutes
Warranty - Lifetime*

Detailed close-up of superior Simplex packaging with reinforced boxes and flat placement of door strips.

Detailed close-up of bottom edge shows proper strip sealing.

Only Simplex gives you outstanding quality at a competitive price.

- Top Quality Vinyl with Reinforced Strips and Lifetime Warranty.*
- The Best Mounting System in the Business. Tracks have anodized coating which won't corrode and protects against all elements.
- Wood Reinforced Packaging Keeps Strips Flat and Protected. Strips hang and seal perfectly with no gaps or curl.
- Simplex Supplies All the Hardware You Will Need. Thumb screws, lag bolts, anchors, self-drilling screws, flat washers, etc. No unnecessary trips to the hardware store.

In short, Simplex Strip Doors are hassle-free, long lasting, and the best value you can find. Because Simplex provides you with the dedicated experience, easy mounting system, and durable vinyl you want and need for your strip doors. Plus a lifetime warranty.

* Lifetime Warranty covers the first 3 inches of each strip. The remainder of the strips are covered for one full year.

Typical Kit Door Immediately after Installation

Installation Time -
1 hour & 15 minutes
**Replacement Time
for 2 Strips** -
25 minutes
Warranty - 30 days

Detailed close-up of typical kit packaging with no reinforcement. Strips are rolled up, and unwrapped hardware could also scratch strips.

Detailed close-up of unsealed bottom edge with curled-up strips and gaps. Could be permanent.

With the typical kit door you get a strip door that performs poorly and is difficult to install and maintain.

- Questionable Vinyl Strip Quality.
- Difficult and Cumbersome Mounting Hardware with Little or No Warranty. Mill-finish aluminum tracks provide no corrosion protection.
- Weak Packaging that Lacks Strip & Hardware Protection. Tightly rolled strips which curl cause uneven gaps that severely affect the ability to seal.
- No Fasteners to Mount the Door on the Wall. (Add one hour to your installation just to run down wall anchors, bolts, etc.)

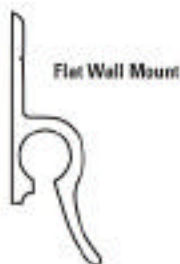

This type of door is really more of a hassle than it's worth.

ARMOR-BOND®
INDUSTRIAL STRIP DOORS

Simplex Strip Doors

You'll love our easy-to-install Bonded Bead mounting system for all your uses. Just mount the sleek, one-piece track and slide your strips right in. It's that easy.
