

Intelligent Storage Systems :-)

We put space to work.™

A close-up photograph of a MetroMax iQ storage system. It features a vertical stainless steel post with two blue plastic clips. A blue label with the 'MetroMax i' logo is attached to the post. The background shows a grid-like structure, likely a storage tray or rack.

i

The ultimate lifetime storage system...built from 304 stainless steel and advanced polymers with Microban® antimicrobial product protection. MetroMax i™ is the preferred solution for most lab, research, and pharmaceutical environments... extremely durable, quick to clean, and warranted for life against rust and corrosion.

Taking storage to the MAX,
now that's...

uni*iQ*ue.

iQ

An intelligent way to improve your ROI. The performance of stainless steel at a fraction of the cost. Easy to clean and maintain in support of good manufacturing practices. Modular components address a variety of applications. Interactive online tools...MetroMax i™ yields real process and operational efficiencies.

i

Flexible, modular... MetroMax i™ is uniquely configurable to address a variety of applications— storage, transport, glassware handling, work tables and high density active aisle systems. Robust shelf mats easily support concentrated loads from analytical equipment. Optional accessories fully compartmentalize and organize your space.

We put space to work.™

System Accessories Adaptable . . .

- a. 8" tall polymer dividers are easily repositioned to separate and contain stored items.
- b. Flexible slide systems fit a variety of Metro Tote Boxes. Store more vertically with easy access to supplies.
- c. Drop-in baskets safely contain glassware and hard to manage items. Cart covers available also.
- d. Beyond transport, casters improve access to walls and hard-to-reach areas of the floor in support of cGMP. Consider Metro casters with polymer horns for improved durability in damp or wet areas and controlled environments. For heavier duty transport applications, dolly bases and plate casters are available.

New MetroMax i™ Uniquely Lifelong...

From top to bottom, a premium storage system that is built to address operational needs for a lifetime. MetroMax i™ offers an innovative, durable, corrosion proof polymer design at a fraction of the cost of stainless steel. Unique performance... shelves provide the strength of steel with quick-to-clean, easy-to-maintain, modular components. Microban® antimicrobial product protection is built into the mats, posts, and frames to inhibit the growth of bacteria, mold, and fungi keeping the product “cleaner between cleanings”. Removable polymer shelf mats, smooth rounded surfaces, and Microban antimicrobial product protection provide an overall cleaner solution enhancing a facility’s cGMP. Modular components can be adapted to a variety of storage, transport, handling, and work station applications. Robust open grid and solid shelf mats safely support concentrated loads from analytical equipment. Open grid mats enhance air flow, and solid mats contain drips and spills. Optional accessories completely compartmentalize and organize your space. Lifelong durability, quick-to-clean design, modular components, and well-organized storage provide efficiency and productivity gains to improve ROI. MetroMax i™...*uniquely justifiable.*

Uniquely Justifiable. . .

Designed with innovative polymers for lifelong product performance, easy-to-clean surfaces to support cGMP protocol, new organizational tools to safely store more, modular components for maximum flexibility, interactive on-line configuration tools... a truly unique way to increase storage capacity, productivity, departmental efficiencies and ultimately your Return On Investment.

Lifelong Durability and Performance: Corrosion proof MetroMax i™ has an innovative lightweight polymer design with the strength and corrosion resistance of stainless steel at a fraction of the cost. Robust shelf mats safely hold concentrated loads from analytical equipment. Open grid shelf mats promote air flow, and one-piece solid shelf mats contain spills and drips.

Supports cGMP: Microban antimicrobial product protection is built into the high contact areas of the products including the shelf mats, frames, and posts to keep products “cleaner between cleanings”. Advanced polymers offer excellent chemical resistance. Smooth surfaces and removable shelf mats promote easier cleaning.

Safe Storage Optimization: System accessories contain, compartmentalize, and organize your stored contents to maximize every cubic inch of storage space. Smooth polymer mats safeguard bottled supplies and protect sealed, bagged items from being compromised. Solid shelf mats contain drips and spills.

Modular Components: MetroMax i™ shelves, posts, mobile components, and accessories can be adapted to a variety of storage, transport, handling, and work station applications.

Uniquely Integrated :-)

MetroMax i™ Shelving System is supported with interactive online tools to help you configure a storage system that is right for you. Visit www.metro.com/iQ where videos provide an introduction to the system.

View MetroMax i™ configurations with tips that point out the best uses of the system. Then, use the online configurator to help you build the exact shelving system you desire. Finally, find all the literature and support materials in one convenient location. MetroMax i™ is uniquely integrated.

System Accessories

Flexible . . .

- e. Stackable shelf ledges prevent items from falling off shelves in stationary or mobile applications.
- f. Shelf-to-Shelf dividers fully utilize the space between two shelves. Use on the interior or the ends of the shelf to manage larger or hard-to-handle items.
- g. Ergonomic handles like the swing up model (pictured) enable easy maneuvering of MetroMax i™ transport carts throughout a facility or campus.
- h. Metro bins organize small items.
