

# AQUARIUS

FISH SYSTEMS

Bringing your environments to life since 1990

# The Ultimate Control in Aquatic Environments

## 1. Rack

- Custom welded, powder-coated aluminum will never rust
- Tubeless Water Delivery
- Top quality valves ensure long, trouble-free life
- Clean-out plug on all manifolds simplifies service
- V-shaped gutters prevent detrital accumulation
- Opaque gutter color prevents algal growth
- Standard and Custom Configurations

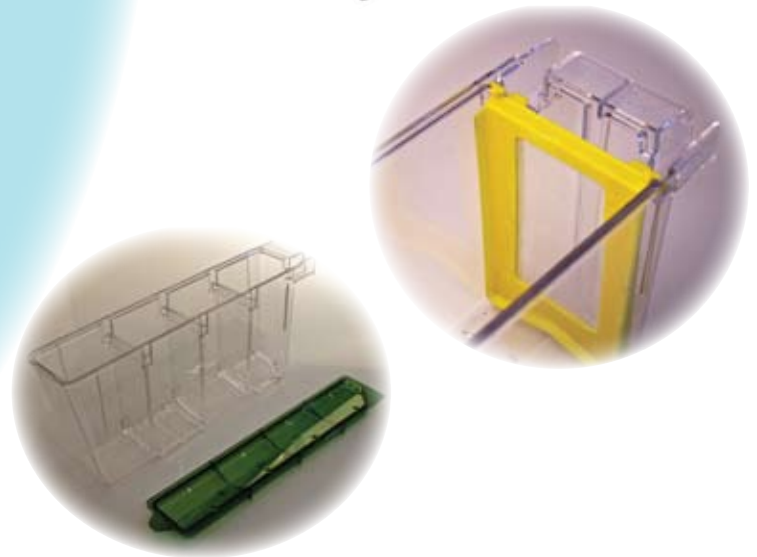

## 2. Filtration

- Rinse and Re-use pre filters and fine filtration
- Save time, money and the environment
- Biological filter is protected from desiccation
- High output UV sterilization exceeds industry standard
- Under-rack filtration maximizes floor space

## 3. Tanks

- 2L, 4L, and 8L tank sizes
- All tank sizes fit on any shelf
- 2L tank can be divided into 4 chambers
- 4L and 8L tanks have removable dividers
- Improved self-cleaning lid design
- EZ Feed lids reduce feeding time
- Recessed lids stay in place so fish do, too
- One baffle fits all tank sizes
- Green tint slows algal growth
- 500 and 750 micron baby screens

# Designed by our biologists who have extensive zebrafish lab management experience

## Features and Benefits:

- Easiest and least expensive zebrafish system to maintain
- Greenest system available
- Monitor, control, and alarm systems
- Fully automated water changers
- Fitted nets for all tank configurations
- **Lifetime Warranty** on all proprietary AFS components

*light cycle cabinets*

## Green Features:

- LED lighting systems for photo period cabinets
- Energy efficient pumps
- Automated water changers mean less waste, greater control
- No consumable filter pad materials, no cost and no waste

*brine shrimp hatcheries*

*under rack filtration*

*tube-less water delivery*

## Bringing your environments to life since 1990

Aquatic Enterprises, Inc. has been providing state-of-the-art engineered solutions for the holding and husbandry of aquatic species since 1990. We listen to our clients and continually improve our products, so you are assured your system is designed and constructed using the best materials and methods. Our designs include integrated aquaria systems to hold hundreds of species of aquatic animals, fish, invertebrates, and reptiles. Our experience covers a wide variety of environments and configurations for applications as diverse as bio-medical research, environmental studies, seafood, hatcheries, and ornamentals. We strive to put this expertise to work for you.

Sincerely,  
*Daniel Vinci*  
President
